Subject: Sediment Coring FSP - Updated Comments List based on review of the RLSO

Hi Davis.

A follow-up to our email provided last Monday on the subsurface coring FSP RTC review.

As you know we didn't have a meeting with Ken and company on the Subsurface Coring FSP RTCs that we wanted to discuss with them and instead, EPA received their RSLO of the FSP.

The following list of comments have been updated based on review of the RLSO and need to be discussed, which I understand will be done immediately after the Porewater discussion:

- Primary Comments: 2, 3, 15, 17, 21, 22
- TBC comment 1 and 3

Let me know if you have any questions, but I recommend resending this updated list to Ken before our meeting next week.

Scott

Subject: FW: Sediment Coring FSP - Any Comments?

Hi Davis.

The following comments from the subsurface coring FSP have conditional approval based on the RTC from the Pre-RD Group and should be discussed in a meeting:

- Primary Comments: 2, 3, 17, 19, 21, 22
- TBC comment 1

The remaining comments have been determined adequate pending review of the RLSO FSP. Let me know if you have any questions.

Thanks,
Scott

Below I note more pressing items for the Pre-RD Group to resolve if they want to mobilize in the coming weeks (according to their schedule) for Surface Water/Sediment Trap sampling and Fish Tracking. These include:

- How Pre-RD Group is going to resolve their lack of meeting a high water stage target for collecting surface water samples this spring. This is not a big issue for EPA (John Kern says targeting high/low/storm stages is not needed for baseline -they should just collect the sample and note the stage level they collected it under), but they should still let EPA know (in writing) what their plans are.

- Addressing Sediment Trap design issues
- Resolving EPA comments on the TSHA and Dive Safety Plan for Sediment Trap Installation
- Providing a TSHA on their Fish Tracking work. I don't think we've received that. We're currently reviewing the Fish Tracking RLSO.
- Resolving Porewater RTCs. No meeting has been set up to discuss the two main issues.

Subject: Sediment Coring FSP - Any Comments?

Davis,

We are ready to wrap up the Sediment Coring FSP and we're wondering if you have anything further w/ respect to the RTC?

As a reminder, here's the timeline:

EPA Comments: February 21

RTC to EPA: March 19

Currently due on April 6

We're preparing to resubmit the RLSO/Clean version, but thought we'd check w/ you first.
